Howard is an architect and BIM (Building Information Modeling) Specialist with Princeton Design Collaborative (PDC). PDC recognizes that BIM documentation is becoming the industry standard. This model enables clients, design team, and contractors who plan, design, construct, operate and maintain diverse physical infrastructures and beyond to the building's life-cycle.

Howards notable projects included the University Medical Center at Princeton, Princeton High School, The New Jersey State Aquarium, Newark Public Library. Howard's professional career includes some local work such as: parking garage for a Trenton Thunder stadium and waterfront redevelopment area; office buildings at Monmouth Shore Corporate Park and 33 West State Street office building also located in Trenton where Howard is a life-long resident of the City of Trenton. Howard has always felt the importance and passion to work on projects locally in his hometown.

Howard has held leadership positions in Information Technology, Corporate Studio CAD, Office Design, and Office Manager. He was instrumental in developing successful firm wide initiatives, standards, and support staff training at past positions he has held.

Howard received a Bachelor's of Architecture from Howard University's School of Architecture and Planning. He was also the Gold Medal Design recipient of his graduating class.

Howard was inducted into a nationally recognized service fraternal organization in the spring of 1981 - Omega Phi Psi - at Howard University.

Howard's interests include: home renovations, antique collecting and spending time at his family retreat at Cape May, NJ.

EDUCATION:

Howard University,
Bachelor of Architecture
